PROSPECTUS OF AN

Important Work on Ferns.

ILLUSTRATIONS OF

The Ferns of North America.

Text by Prof. Daniel C. Eaton, of Yale College. Illustrations by Mr. Jas. H. Emerton.

S. E. CASSINO, NATURALISTS' AGENCY.
Salem, Mass.

The need of a carefully prepared, and thoroughly illustrated work on the American Ferns, has long been felt by those studying these beautiful plants. As yet, no work whatever has made its appearance which contains even a description of all our American species, and the few that have been figured at all, are found scattered through so many foreign works that it is quite impossible to find them, even in an excellent library.

Prof. Eaton has for a long time had in contemplation the writing of a work which should possess all the requirements of a scientific student and at the same time be so popular, and so thoroughly illustrated that those unfamilar with botanical methods could be able with perfect ease to determine any of our American Ferns.

The great cost of preparing the plates, suitably drawn and colored, for illustrating a work of such extent, has until now, debarred publishers from undertaking its publication. The undersigned has decided to undertake to publish the work, believing that he will be sustained by the Botanists of America, and that his facilities for properly bringing the work before the scientific world are unsurpassed.

The services of Mr. J. H. Emerton, so well known for his remarkably accurate, and highly finished Natural History drawings, have been secured to illustrate the work. Mr. Emerton's great experience as a botanical draughtsman, and his knowledge of botany will give assurance that the illustrations will not be excelled by any yet published and that the work will be a fit companion to the "Wild Flowers of America," now publishing.

Prof. Eaton's herbarium of Ferns is the largest in America and he is constantly in receipt of additional plants from all parts of the country. He is therefore in a position to better conduct the work and furnish the necessary specimens for illustrations than any other person. Besides the labors of Prof. Eaton and Mr. Emerton, Dr. Gray of Cambridge, has expressed an interest in the undertaking and kindly offered the use of the extensive herbarium of the Botanical Gardens, for consultation. The Mass. Horticultural Society has also freely offered the use of the Davenport herbarium of ferns. The publishers will also have the assistance of Mr. J. Robinson, well known as a Fern specialist. Mr. Geo. E. Davenport and Mr. Chas. E. Faxon, of Boston, Mrs. Cooper of Santa Barbara, Cal., and others in various parts of the country, have kindly offered their assistance.

Hon. J. Warren Merrill, widely known as having the largest and most valuable collection of American Ferns in cultivation, has very liberally offered living specimens from

The Work will be issued in large quarto parts, at intervals of about two months, which is as fast as the plates can be prepared. In the course of the publication of the Work, every species known to inhabit the U.S. will be figured. Each part will contain three elegant 4to plates, colored by Chromo Lithography, giving exact representations of from one to three species each. The paper on which the plates are printed will be the

best in the market. It will require about twenty parts to complete the work.

The text will be printed in large beautiful new type by the well known firm of Rand,

Avery & Co., on super-calendered paper, made expressly for the work.

The Subscription price, will be \$1.00 per part, which it is believed, is lower than any

work of the same nature and quality yet published. Botanists, who desire to inspect the work before subscribing, will receive a sample

plate and text, by mail upon application.

For the benefit of any young botanists who do not feel able to purchase the Work, the publisher offers an opportunity to obtain a copy, by procuring a few subscribers in

their vicinity. Any lady can easily obtain four subscribers for the Work among her friends and thus secure a copy for nothing.

SCIENTISTS' DIRECTORY, 299 Washington Street.

Boston, Mass., U. S. A., Mass., 1881.

Dear Sir:

Below we give a slip from the last edition of the Naturalists' Directory. You will confer a great favor by correcting the same for the new INTERNATIONAL SCIENTISTS' DIRECTORY now in preparation. (Full particulars given in accompanying circular letter.)

 $S.\ E.\ CASSINO.$

Slip.

ENGELMANN, GEO., M. D., 3003 Locust St., St. Louis. Bot. Met.

I agree to take cop of the International Scientists' Directory when published, at \$2. each.

(The price bound in cloth, \$2.50. Bound in paper, \$2.00.)

The edition will be limited strictly to the number of subscriptions received in advance. In order to secure a copy, subscriptions must be given when this blank is returned. Money may be sent with the blank, or when the Directory is ready, at option of the subscriber. In every case a receipt will be sent.

Please return this blank to

INTERNATIONAL SCIENTISTS' DIRECTORY,

299 Washington Street.

Boston, Mass., U. S. A., 1881.

Dear Sir:

We beg to hand you with this a slip from the Naturalists' Directory, 1880 edition, and request that you correct, and make such additions as may be desired, and return to us at your earliest convenience. We desire especially that you senā us all names that should be in the work, corrections, errors, etc. We will gladly send you a package of blanks for the new edition if you can give them to friends who are not acquainted with the work.

We wish to call your attention to the fact that the edition now preparing will be a

SCIENTISTS' DIRECTORY OF THE WORLD,

and will contain the names and specialties of Scientists in every quarter of the globe. The usefulness of the work will thus be greatly increased, as you will readily see.

As the work will be greatly enlarged in size it is necessary that the price should also be advanced, and it has been placed at two dollars (\$2.00) for the paper edition and two and one-half dollars (\$2.50) for cloth bound copies. As the foreign department will not be given again for several years (probably five), it will be necessary to order at once. As the expense of this department will be very great we hope you will conclude to subscribe for a copy of the work. If you have foreign correspondents we would be pleased to have a list of them.

The arrangement of names will be alphabetical, but should the subscription list be large enough to warrant it, the names will also be arranged in a condensed form, by States, as in the last edition, which gave much better satisfaction than was anticipated.

Hoping you will give this matter your early attention we are,

Yours respectfully,

S. E. CASSINO,

Editor.
